In the research, "Eysenck Personality Questionnaire" was used, which occurs from the Manual of the Eysenck Personality Questionnaire (adult and junior). The 90-item Eysenck Personality Questionnaire (EPQ) was used in the research. The Cornell Index was also used. It is important to check the reliability and validity of the questionnaire and to make sure it accurately measures the intended constructs.

(a) Eysenck Personality Questionnaire (EPQ), (b) The Symptom Checklist-90 (SCL-90), (c) The Eysenck personality questionnaire consists...
of 84 entries evaluated in a study which examined the effects of a 5-week stress management program for 40 junior Eysenck, H.J. Eysenck, S.B.G. Manual of the EPQ (Personality.

See author for a copy of the CBT treatment manual, the ACT manual. Confounding influences from therapist allegiance were deemed unlikely given the junior status.

evaluated using the Arabic version of the Eysenck Personality Questionnaire. Questionnaire (EPQ-R) (12–15), and the Eysenck Personality Inventory (EPI) (16). Arabic Version of the Eysenck Personality Questionnaire: Junior and Adults. Administering the Questionnaires, Manual of the Eysenck Personality Scales.
